Muhammad Aadil Ghani

Cyber Security MSci | AI/ML & Cloud Developer
United Kingdom

Summary

With a Master's in Computer Science with Cyber Security, I bring hands-on experience across both cyber security and AI/ML domains. My work integrates deep learning with large-scale data and cloud technologies to solve real-world challenges with a focus on secure, intelligent systems.

Experience

TJX Europe

Sales Associate

October 2023 - January 2024 (4 months)

London Area, United Kingdom

Supervised daily sales transactions at the till with precision and efficiency, ensuring accurate processing and excellent customer interactions.

Organised and placed over 250 items per day to maintain high standards of store orderliness and visual appeal.

Delivered exceptional customer service to over 100 customers daily, swiftly adapting to fast-paced retail demands and maintaining a welcoming shopping environment.

Collaborated effectively with team members to enhance store operations, resulting in a 20% increase in overall efficiency and customer satisfaction.

Meta

Mentee – Facebook's Elevate Mentorship Programme

June 2020 - September 2020 (4 months)

London Area, United Kingdom

Selected for Facebook's Elevate Mentorship Programme, a competitive 10-week initiative delivered remotely during the UK national lockdown. Mentored by a Staff Software Engineer at Facebook, I received 1 to 1 personalised coaching and development support across both technical and professional domains.

-Completed the STACK survey to assess Self-awareness, Teamwork, Attitude, Communication, and Knowledge, helping identify key strengths and areas for development.

-Participated in Java coding practice, debugging exercises, and technical walkthroughs to strengthen programming fundamentals.

-Received one-on-one mentoring focused on clean code principles, problem-solving, and technical communication.

-Gained valuable insight into the daily responsibilities and workflows of a Software Engineer at Facebook.

-Built a strong mentor relationship and professional network, gaining career guidance and feedback throughout the programme.

Al Hayat Accounting Consultancy

Data Analyst

April 2018 - May 2018 (2 months)

London Area, United Kingdom

Coordinated the analysis of over 2,000 entries in Excel spreadsheets, generating insights that led to a 15% improvement in operational efficiency. Utilised data-driven decision-making to streamline processes.

Established and deployed three optimised spreadsheets tailored for financial calculations, reducing processing times by 25% and enabling faster, more accurate financial reporting.

Digitised over 500 paper records into digital formats using Excel, maintaining zero errors to ensure the data's accuracy, accessibility, and longevity for future operations.

Automated routine tasks within Excel, minimising manual data entry and improving report generation speed, resulting in more efficient team collaboration.

Worked closely with cross-functional teams to understand data needs and deliver actionable insights, enhancing decision-making at multiple levels within the organisation.

Education

City, University of London

Integrated Master's degree, Computer Science with cyber security

Eastbury Community School

Mathematics, Computer Science and Chemistry
